

Mold your
future at **Husky**

Supporting the
world's leading brands

Husky is a global company with a strong foundation built on innovation, close customer relationships, a strong sense of community and a unique culture and values. We are looking for people with the inspiration and talent to develop with us as we pursue our ambitious growth strategy and offer career development opportunities, as well as an apprenticeship and internship program.

Husky offers a wealth of opportunity for personal growth and development. Most importantly, Husky offers an opportunity to work with – and be challenged by – a team of great people. Our success is possible because of the creativity, intelligence and passion of our people around the world and their desire to lead change. At the same time, we are not afraid to expect a lot and strive for leadership in all of our key markets. We are a company taking on new challenges and for the right people this means exceptional career development opportunities, the chance to be part of a team that is the best in the world at what we do and the experience that comes from working in an environment that demands constant transformation and innovation.

Husky is an exciting company with tremendous potential. We have a great team and great expectations. If you are attracted to bold goals, believe in uncompromising honesty, support mutual respect, care about environmental responsibility, have a passion for excellence and a desire to make a positive contribution – then we want you to join the Husky team!

Mechanical Development Engineer (m/f)

After an initial training period in our European Headquarters in Dudelange, Luxembourg, you will be part of the Development Engineering Team responsible for Beverage Packaging Tooling and Machines. In this role you will layout concepts and deliver robust designs on time as part of the Product Development process. Focus will be on machine development.

Responsibilities:

- Continually seek out new opportunities to improve our product – try to find the optimum engineering solution.
- Lead development engineering projects and deliver on time high quality, high performance and cost effective concepts and designs.
- Creation of Design Documents, Validation Plans and Husky Standards.
- Follows general engineering and calculation rules and standards – no guessing – always follow best practices.
- Participating in cross-functional teams and effectively collaborating worldwide with engineering-, manufacturing-, sourcing-, service-, test- and validation teams.
- Develop and follow complex project-plans including detailed milestone-setting and time-line generation. Effective communication of project status.

Qualifications:

- Bachelor or Master Degree in Mechanical Engineering.
- Experience in development engineering desired.
- Strong knowledge in CAD applications.
- Innovative and creative mindset – strong desire to solve challenges through innovation and collaboration.
- Strong communication, project management and organization skills.
- GD&T (Geometric Dimensioning and Tolerancing) and tolerance stack up analysis experience (VisVSA) is an asset.
- Strong command of English language.
- Any additional language skills considered an asset

Husky Injection Molding Systems offers a competitive compensation and benefits package and excellent opportunities for growth and advancement. We are committed to equal employment opportunity and respect, value and welcome diversity in our workplace. Husky also values being a great place to work and strives to maintain a safe workplace. No agency or telephone inquires please.
